

# Centre of Policy Studies (CoPS)

20 years of working with Indonesia

# CoPS has worked in Indonesia since 1995

## **With:**

- **Gadjah Mada University, Yogyakarta**
- **Universitas Padjadjaran, Bandung**
- **Several government departments in Jakarta**
  
- **A number of Indonesians have visited CoPS for periods of up to a year.**
  
- **Several Indonesian PhD students have graduated from CoPS.**
  
- **CoPS staff have visited Java numerous times; to do research with Indonesians or to conduct training courses.**

# Key collaborations

**1995-2000** Worked with Professor Anggito Abimanyu and team at PAUM Centre at Gadjah Mada University, Yogyakarta to build INDORANI, a large CGE model of Indonesia. Model is used for policy analysis (with a special focus on regional and income disparity) and to analyse the effects of the Asian crisis.

**1999-2002** Anggito moves to Jakarta; continue to work with him and Edimon Ginting doing various government-related simulations. Conducted influential analyses of the fuel subsidy.

# Emphasizing training and technology transfer

**February 2001 Yogyakarta CGE Modelling Course**

**one of several courses during 1998-2002,  
aimed at academics and government workers**

**2005-8: Worked with Professor Armida Alisjahbana and team, of CEDS (Padjajaran University) to construct multiregional CGE model of the Indonesian and West Java economies, designed to study the national and regional (West Java) impacts of national and regional economic policies.**

**2008-present: More work with Armida (now at BAPPENAS), Arief Yusuf at CEDS and Edimon Ginting at ADB to construct larger INDOTERM CGE model distinguishing all provinces of Indonesia.**

**Simulations examining the regional effects of:**

- infrastructure investment, eg MP3EI
- reduced growth in the palm-oil sector
- effects of building a new coalmine in East Kalimantan

**2014-15: Worked with Hidayat Amir at Ministry of Finance, to model energy demands**

**Still more training courses!**

**2014 Dynamic Regional CGE Modelling Course in Bandung**

# ECONOMY-WIDE IMPACT OF A MORE EFFICIENT TANJUNG PRIOK PORT
